

Vadim Sinitsyn

Memphis, TN 38120

(314) 640-7518; sinivad44@gmail.com

Professional Summary

Motivated data scientist with over fifteen years of experience. Strong background in development machine learning models. Mathematical education provides a foundation for comprehending machine learning techniques and data preprocessing methodologies.

Skills

- Strong background in mathematics and algorithms relating to data science.
- Proficient in Excel (including VBA coding for macros).
- Python
 - Proficient in numpy, pandas, sklearn libraries.
 - Proficient in Tensorflow and Pytorch libraries.
- Proficient in SQL.
- Have experience with C++, HTML and Java.

Professional Experience

Head of Data Science and Machine Learning, McVean Trading and Investments January 2021 – present. Macroeconomic and Grain Analyst, McVean Trading & Investments, LLC May 2007 – present.

Date Science:

- Lead a team of grain analysts to create a corn and soybean yield model (neural network) from plant development statistics and weather data from various crop districts in the United States and Argentina.
- Responsible for tracking, organizing and analyzing options data in Livestock and Grain markets.
- Created and maintained machine learning trading algorithms (Neural Networks and Random Forests) from options and futures data related to futures of corn, soybeans, wheat, crude oil, soybean oil, cattle and hogs with an accuracy of 52% over the past 3 years.
- Contributed to creating US and World balance sheet projections for Corn, Wheat and Oilseeds.
- Analyzed and presented macroeconomic indicators, particularly in the US, providing insights that informed investment strategies.
- Managed a database of vessel lineups from Brazil and Argentina, providing critical logistics data that enhanced supply chain analysis and trading strategies.
- Co-lead research on the US cattle herd model, resulting in more accurate herd size forecasts.

Macroeconomics:

-

- Developed and delivered over 50 presentations on the macroeconomic environment.
- Summarized earning calls from food/beverage and commodity companies for industry insights.
- Conducted monthly financial reviews of McVean's depository institutions, identifying opportunities for cost reduction and improving liquidity management
- Authored a weekly Russian grain & meat newsletter with a readership of over 40 people, providing timely updates on agriculture news, which enhanced market positioning and client decision-making.
- Aggregated and summarized macroeconomic and geopolitical research, delivering actionable insights that improved strategic investment decisions.
- Developed investment strategies for Eurodollar/SOFR futures, currencies and industrial materials.

Education:

Bachelor of Science: Applied Mathematics, Illinois Institute of Technology, 2003 -2007

Bachelor of Science: Compute Science, Illinois Institute of Technology, 2003 -2007

Post Graduate Program in Data Science, Purdue University, 2024

Udemy.com courses completed: Complete Data Science Bootcamp; Mathematical foundations of Machine Learning; Web Scraping in Python; Time Series Analysis in Python; Mastering OpenAi Python API; Pytorch for Deep Learning; Modern Artificial Intelligence MasterClass; Decision Trees, Random Forests, Adaboost & XGBoost; Oracle SQL certification Course. **(2020-2024)**
